

Two-Column Evidence Review

Column 1 first logical sentence.

Column 1 second logical sentence.

Column 2 first logical sentence.

Column 2 second logical sentence.

Page-Local Footnote Evidence

Source order is validated before bounded zone planning begins.

Contact-sheet evidence covers every rendered output page exactly once.

Semantic review checks every required quality dimension.

Validated Korean text remains selectable in the staged PDF.

Automated QA records exact output and contact-sheet page counts.

Final publication exposes exactly three reviewed artifacts.

The deterministic workflow includes a page-local note ¹

¹ Footnote evidence remains linked to its marker.
